Section 1

To do

Epic 0 — Project scaffolding

Epic 1 — READ (view content in three formats) — the core MVP hypothesis

Epic 2 — Gallery CMS (Django admin)

Epic 3 — Authentication (registration → login → logout → reset)

Epic 4 — CREATE (save an article / collection)

Epic 5 — READ wishlist + UPDATE (annotations)

US-5.1 — View my collection

As a logged-in prospect, I want to see saved artworks with full content, so that I can reference them after the visit.

Richard Glynn

US-5.2 — Annotate a saved exhibit

As a logged-in prospect, I want to add/edit private notes on a saved artwork, so that I can record my thoughts before deciding.

Richard Glynn

Epic 6 — DELETE

US-6.1 — Remove a saved exhibit

As a logged-in prospect, I want to remove an artwork from my wishlist, so that it stays relevant

Richard Glynn

US-6.2 — Delete a collection

s a logged-in prospect, I want to delete a whole wishlist, so that I can clear data I no longer need.

Richard Glynn

Epic 7 — QR Code

Epic 8 — Visitor Intelligence & Lead Capture (the differentiator)

US-8.1 — Capture engagement events

As a gallery operator, I want every scan/listen/watch/read recorded against an artwork, so that I learn what draws real attention.

Richard Glynn

US-8.2 — Opt-in lead capture

As a prospect, I want to save a piece or request a price list and optionally share my contact, so that the gallery can follow up with relevant works.

Richard Glynn

US-8.3 — Gallery lead inbox with context

As a gallery operator, I want a list of leads with what each prospect engaged with, so that my sales follow-up is informed.

Richard Glynn

US-8.4 — Engagement analytics by artwork

As a gallery operator, I want to see which works/price points/artists generate the most engagement, so that I can plan shows and sales effort.

Richard Glynn

US-8.5 — CRM export / handoff

As a gallery operator, I want to export leads (CSV/webhook) into my existing CRM, so that the tool fits my workflow.

Richard Glynn

Epic 9 — PWA resilience (cross-cutting)

US-9.1 — Offline within a visit

As a prospect, I want the show's artwork set cached on first scan, so that content loads in WiFi dead spots.

Richard Glynn

In progress

In review

Completed

US-0.1 — Set up the Django project

Richard Glynn

US-0.3 - Define the data model & migrations

As a developer, I want Gallery, Show, Artwork, Collection, CollectionItem, EngagementEvent and Lead models migrated, so that content, intelligence and leads can be stored.

Richard Glynn

US-1.1 — As a visitor, I want to scan a QR code, so that I can see the exhibit information/story instantly.

Richard Glynn

US-1.2 — Read the full text

As a prospect, I want to read the statement/provenance at my own pace with adjustable text size, so that I can go as deep as I want.

Richard Glynn

US-1.3 — Listen to audio narration

As a prospect, I want to play audio, so that I can keep looking at the work hands-free.

Richard Glynn

US-1.4 — Watch the video

As a prospect, I want to watch a short film on the work/artist, so that I can see detail and process.

Richard Glynn

US-2.1 — Open an artwork page from a scan

As a prospect, I want scanning the QR code to open the page in under 2 seconds without an app, so that I get the story instantly.

NOTE: create a button to trigger this until QR functionality developed in Sprint 5

Richard Glynn

US-3.1 — Register an account

As a prospect, I want to create an account with email and password, so that I can save artworks and get show alerts.

Richard Glynn

US-3.2 — Log in

As a prospect, I want to log in, so that I can access my wishlist.

Richard Glynn

US-3.4 — Log out

As a prospect, I want to log out, so that my account is secure on a shared device.

Richard Glynn

US-3.5 — Reset password

As a prospect, I want to reset a forgotten password by email, so that I can regain access.

Richard Glynn

US-3.3 — Save content upon login (gate flow)

As a prospect who tapped "Save" while logged out, I want to register/log in and have the save complete automatically, so that I don't lose my place.

Richard Glynn

US-5.3 — Rename / edit a collection

As a logged-in prospect, I want to rename a wishlist, so that it stays organised.

Richard Glynn

US-1.1 — As a visitor, I want to scan a QR code, so that I can see the exhibit information/story instantly.

Richard Glynn

US-2.2 — Upload artwork media

As a gallery operator, I want to attach audio, video and high-res images, so that prospects can listen, watch and zoom.

Richard Glynn

US-0.1 — Set up the Django project & REST API

Richard Glynn

US-0.2 — Set up the React PWA client

As a developer, I want a React app with routing, an API client and PWA manifest/service worker, so that the frontend can call the API and be installable.

Richard Glynn

US-0.2.1 — Set up Django REST

As a developer, I want to set up Django REST so that it acts as the inteface between the React PWA client and the Django back-end

Richard Glynn

US-4.1 — Save an artwork to my wishlist

As a logged-in prospect, I want to save an artwork with one tap, so that I can revisit it and signal interest.

Richard Glynn

Backlog

Type anything, @mention anyone

Type anything, @mention anyone

Type anything, @mention anyone

US-4.2 — Create / name a collection

As a logged-in prospect, I want to create and name wishlists, so that I can organise pieces by show or theme.
